Case	:	JUDYHICKMAN, et al. vs. JOSE NORBERTO, M.D., et al.
Testimony Date	:	June 09, 2005
Expert Witness	:	PETER SMITH M.D.
Expert Type	:	Surgery - General
Court	:	State: Ohio County: Fairfield
Pages	:	92

	-	
1		3
State of Ohio,)	1	PETER K. SMITH, M.D.
County of Fairfield) SS:	2	of lawful age, called by the Plaintiffs for
	3	examination pursuant by the Ohio Rules of Civil
IN THE COURT OF COMMON PLEAS	4	Procedure, having been first duly sworn, as
JUDY HICKMAN, et al.,)	5	hereinafter certified, was examined and testified
	6	as follows:
Plaintiffs,)	7	EXAMINATION OF PETER K. SMITH, M.D.
ys.)Case No. 2003CV01000	8	BY MR. TRACI:
vs.)Case No. 2003CV01000)Judge Martin	9	Q Doctor, my name is Bob Traci and I, of course,
JOSE NORBERTO, M.D., et al.,)	10	represent the Plaintiffs, the Hickmans, in
	11	this case. Would you state your name and
Defendants.)		
	12	address for the record, please?
THE VIDEO TELECONFERENCE OF PETER K. SMITH, M.D.	13	A Peter K. Smith, 201 Ukiah Lane, that's
Thursday, June 9, 2005	14	U-K-I-A-H Lane, Chapel Hill, North Carolina.
	15	Q That's your residence address; is that
The video teleconference of PETER K. SMITH,	16	correct?
M.D., called by the Plaintiffs for examination	17	A That's correct.
pursuant to the Ohio Rules of Civil Procedure,	18	Q Your professional address is at Duke
taken before me, the undersigned, Michelle M.	19	
Lewis, a Registered Professional Reporter and		University Medical Center?
Notary Public within and for the State of Ohio,	20	A That's correct.
taken at the offices of Cady Reporting Services,	21	Q Okay. I was provided via e-mail with by
Inc., 1225 Illuminating Building, 55 Public	22	Jerry with a 22 page CV for you that has in
Square, Cleveland, Ohio, commencing at 3:21 p.m.,	23	the upper left-hand corner updated June 2nd,
the day and date above set forth.	24	2005. Are you familiar with that document?
	25	A I believe so.
2		
2 APPEARANCES:	1	Q Okay. Is there anything it was updated
	2	· · · ·
On behalf of the Plaintiffs:	1	June 2nd, as I said. Is there anything that
Robert V. Traci, Esq.	3	we need to add to this or that you would like
Robert V. Traci Company, LPA	4	to add to it that might not be included on it?
835 Sharon Drive, Suite 350	5	A No.
Westlake, Ohio 44145	6	Q Okay. You are board certified in what
440.835.1800	7	specialties, Doctor?
	8	A I'm board certified in surgery and in thoracic
On behalf of the Defendants:	9	surgery.
Gerald J. Todaro, Esq.	10	Q General surgery?
Arnold Todaro & Welch	1	
2075 Marble Cliff Office Park	111	A Wall it's actually surgery but most people
		A Well, it's actually surgery, but most people
Columbus, Ohio 43215	12	say general surgery.
Columbus, Ohio 43215 614.485.1800	12 13	say general surgery. Q Okay. And you got your surgical board when
	12 13 14	say general surgery. Q Okay. And you got your surgical board when approximately? Is that on here?
	12 13	say general surgery. Q Okay. And you got your surgical board when
	12 13 14	say general surgery. Q Okay. And you got your surgical board when approximately? Is that on here?
	12 13 14 15	say general surgery. Q Okay. And you got your surgical board when approximately? Is that on here? A 1980 88 maybe.
	12 13 14 15 16 17	 say general surgery. Q Okay. And you got your surgical board when approximately? Is that on here? A 1980 88 maybe. Q Oh, I'm sorry. Certifications, actually 87, December 87.
	12 13 14 15 16 17 18	 say general surgery. Q Okay. And you got your surgical board when approximately? Is that on here? A 1980 88 maybe. Q Oh, I'm sorry. Certifications, actually 87, December 87. A 87.
	12 13 14 15 16 17 18 19	 say general surgery. Q Okay. And you got your surgical board when approximately? Is that on here? A 1980 88 maybe. Q Oh, I'm sorry. Certifications, actually 87, December 87. A 87. Q And you've been recertified in thoracic
	12 13 14 15 16 17 18 19 20	 say general surgery. Q Okay. And you got your surgical board when approximately? Is that on here? A 1980 88 maybe. Q Oh, I'm sorry. Certifications, actually 87, December 87. A 87. Q And you've been recertified in thoracic surgery. You were certified in 89 and
	12 13 14 15 16 17 18 19 20 21	 say general surgery. Q Okay. And you got your surgical board when approximately? Is that on here? A 1980 88 maybe. Q Oh, I'm sorry. Certifications, actually 87, December 87. A 87. Q And you've been recertified in thoracic surgery. You were certified in 89 and recertified in 99. Does that sound right?
	12 13 14 15 16 17 18 19 20 21 22	 say general surgery. Q Okay. And you got your surgical board when approximately? Is that on here? A 1980 88 maybe. Q Oh, I'm sorry. Certifications, actually 87, December 87. A 87. Q And you've been recertified in thoracic surgery. You were certified in 89 and recertified in 99. Does that sound right? A That's correct. And I recertified in general

So if you actually study the subject you find that reducing MIs is not one of the principal outcomes of this surgery. And a CABG procedure is specifically to bypass blockages in coronary arteries by using some type of a graft upstream from the blockage and reattaching downstream from the blockage to get around or avoid the blockage? That's right. Under what circumstances do surgeons in CABG
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q A Q A Q A Q	It's about 85 percent bypass surgery and the remainder is valve surgery. Okay. How much of your professional time is spent in an administrative capacity? About 25 percent. On your CV, which as we just discussed it rather extensively, are there any particular articles or publications that you have that have particular relevance to the issues in this case? Not really. Are there any of your publications that address specifically the risks of redo CABG procedures? Not that I recall, but I wouldn't be surprised if it's in there somewhere. But you can't recollect any specific one?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A Q A	symptoms. But reducing MIs is not not something that I ever tell a patient is the reason we're doing it. That would be a side benefit? It can be, although MIs can be associated with the surgery that we do. So if you actually study the subject you find that reducing MIs is not one of the principal outcomes of this surgery. And a CABG procedure is specifically to bypass blockages in coronary arteries by using some type of a graft upstream from the blockage and reattaching downstream from the blockage to get around or avoid the blockage? That's right. Under what circumstances do surgeons in CABG procedures hook a bypass coronary artery to a
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q A Q A Q A Q	It's about 85 percent bypass surgery and the remainder is valve surgery. Okay. How much of your professional time is spent in an administrative capacity? About 25 percent. On your CV, which as we just discussed it rather extensively, are there any particular articles or publications that you have that have particular relevance to the issues in this case? Not really. Are there any of your publications that address specifically the risks of redo CABG procedures? Not that I recall, but I wouldn't be surprised if it's in there somewhere. But you can't recollect any specific one? No. It would have been maybe the subtext of a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A Q A Q	symptoms. But reducing MIs is not not something that I ever tell a patient is the reason we're doing it. That would be a side benefit? It can be, although MIs can be associated with the surgery that we do. So if you actually study the subject you find that reducing MIs is not one of the principal outcomes of this surgery. And a CABG procedure is specifically to bypass blockages in coronary arteries by using some type of a graft upstream from the blockage and reattaching downstream from the blockage to get around or avoid the blockage? That's right. Under what circumstances do surgeons in CABG procedures hook a bypass coronary artery to a downstream vein?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	Q A Q A Q A Q	It's about 85 percent bypass surgery and the remainder is valve surgery. Okay. How much of your professional time is spent in an administrative capacity? About 25 percent. On your CV, which as we just discussed it rather extensively, are there any particular articles or publications that you have that have particular relevance to the issues in this case? Not really. Are there any of your publications that address specifically the risks of redo CABG procedures? Not that I recall, but I wouldn't be surprised if it's in there somewhere. But you can't recollect any specific one? No. It would have been maybe the subtext of a general article on coronary disease outcome,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	A Q A Q A	symptoms. But reducing MIs is not not something that I ever tell a patient is the reason we're doing it. That would be a side benefit? It can be, although MIs can be associated with the surgery that we do. So if you actually study the subject you find that reducing MIs is not one of the principal outcomes of this surgery. And a CABG procedure is specifically to bypass blockages in coronary arteries by using some type of a graft upstream from the blockage and reattaching downstream from the blockage to get around or avoid the blockage? That's right. Under what circumstances do surgeons in CABG procedures hook a bypass coronary artery to a downstream vein? That would be a very rare intent.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q A Q A Q A Q A	It's about 85 percent bypass surgery and the remainder is valve surgery. Okay. How much of your professional time is spent in an administrative capacity? About 25 percent. On your CV, which as we just discussed it rather extensively, are there any particular articles or publications that you have that have particular relevance to the issues in this case? Not really. Are there any of your publications that address specifically the risks of redo CABG procedures? Not that I recall, but I wouldn't be surprised if it's in there somewhere. But you can't recollect any specific one? No. It would have been maybe the subtext of a general article on coronary disease outcome, something like that.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A Q A Q A Q	symptoms. But reducing MIs is not not something that I ever tell a patient is the reason we're doing it. That would be a side benefit? It can be, although MIs can be associated with the surgery that we do. So if you actually study the subject you find that reducing MIs is not one of the principal outcomes of this surgery. And a CABG procedure is specifically to bypass blockages in coronary arteries by using some type of a graft upstream from the blockage and reattaching downstream from the blockage to get around or avoid the blockage? That's right. Under what circumstances do surgeons in CABG procedures hook a bypass coronary artery to a downstream vein? That would be a very rare intent. And why is that?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q A Q A Q A Q A	It's about 85 percent bypass surgery and the remainder is valve surgery. Okay. How much of your professional time is spent in an administrative capacity? About 25 percent. On your CV, which as we just discussed it rather extensively, are there any particular articles or publications that you have that have particular relevance to the issues in this case? Not really. Are there any of your publications that address specifically the risks of redo CABG procedures? Not that I recall, but I wouldn't be surprised if it's in there somewhere. But you can't recollect any specific one? No. It would have been maybe the subtext of a general article on coronary disease outcome, something like that. Fair enough.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A Q A Q A Q	symptoms. But reducing MIs is not not something that I ever tell a patient is the reason we're doing it. That would be a side benefit? It can be, although MIs can be associated with the surgery that we do. So if you actually study the subject you find that reducing MIs is not one of the principal outcomes of this surgery. And a CABG procedure is specifically to bypass blockages in coronary arteries by using some type of a graft upstream from the blockage and reattaching downstream from the blockage to get around or avoid the blockage? That's right. Under what circumstances do surgeons in CABG procedures hook a bypass coronary artery to a downstream vein? That would be a very rare intent. And why is that? Well, the only reason that you would do that,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q A Q A Q A Q A	It's about 85 percent bypass surgery and the remainder is valve surgery. Okay. How much of your professional time is spent in an administrative capacity? About 25 percent. On your CV, which as we just discussed it rather extensively, are there any particular articles or publications that you have that have particular relevance to the issues in this case? Not really. Are there any of your publications that address specifically the risks of redo CABG procedures? Not that I recall, but I wouldn't be surprised if it's in there somewhere. But you can't recollect any specific one? No. It would have been maybe the subtext of a general article on coronary disease outcome, something like that. Fair enough. Do you recognize any particular	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A Q A Q A Q	symptoms. But reducing MIs is not not something that I ever tell a patient is the reason we're doing it. That would be a side benefit? It can be, although MIs can be associated with the surgery that we do. So if you actually study the subject you find that reducing MIs is not one of the principal outcomes of this surgery. And a CABG procedure is specifically to bypass blockages in coronary arteries by using some type of a graft upstream from the blockage and reattaching downstream from the blockage to get around or avoid the blockage? That's right. Under what circumstances do surgeons in CABG procedures hook a bypass coronary artery to a downstream vein? That would be a very rare intent. And why is that? Well, the only reason that you would do that, you would ligate the coronary vein and attempt
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q A Q A Q A Q A	It's about 85 percent bypass surgery and the remainder is valve surgery. Okay. How much of your professional time is spent in an administrative capacity? About 25 percent. On your CV, which as we just discussed it rather extensively, are there any particular articles or publications that you have that have particular relevance to the issues in this case? Not really. Are there any of your publications that address specifically the risks of redo CABG procedures? Not that I recall, but I wouldn't be surprised if it's in there somewhere. But you can't recollect any specific one? No. It would have been maybe the subtext of a general article on coronary disease outcome, something like that. Fair enough. Do you recognize any particular	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A Q A Q A Q	symptoms. But reducing MIs is not not something that I ever tell a patient is the reason we're doing it. That would be a side benefit? It can be, although MIs can be associated with the surgery that we do. So if you actually study the subject you find that reducing MIs is not one of the principal outcomes of this surgery. And a CABG procedure is specifically to bypass blockages in coronary arteries by using some type of a graft upstream from the blockage and reattaching downstream from the blockage to get around or avoid the blockage? That's right. Under what circumstances do surgeons in CABG procedures hook a bypass coronary artery to a downstream vein? That would be a very rare intent. And why is that? Well, the only reason that you would do that, you would ligate the coronary vein and attempt to perfuse the heart retrograde. And there
